HOTEL SHINY GRAND

Best time to visit Guwahati and the Northeast

Month by month, and the one month that needs a plan rather than a warning.

October to March: the easy window

- Cooler days, clearer skies, festival season.
- Also the busiest, so book festival weekends first.

December to mid-February: the fog window

- At LGBI Airport, 49.7% of reports in these months showed visibility below 1.5 miles (2.4 km).
- Low visibility clusters between 4 AM and 9 AM.
- Pre-dawn departures need a buffer, an airport-side night, or both.

April to May: hot, before the rain

- Daytime heat builds through May.
- Fewer crowds; do the hill stations rather than the plains.

June to September: monsoon

- Green and dramatic, with rain on most days.
- Roads in the hills slow down; waterfalls and Kaziranga's rivers are at their fullest.
- Build slack into any itinerary with a fixed flight at the end.

Hotel Shiny Grand

- Airport side, which shortens the most tedious part of a monsoon arrival.
- Free luggage storage for weather-proofing your plans.
- Ask the front desk about the road conditions before you set off.
